Visit by Elizabeth May

Sidney, BC: Empire Hydrogen Energy Systems Inc. has been honored by the visit of our local Member of Parliament and Leader of the Green Party of Canada, Elizabeth May, earlier this week. Ms May spent an hour in our plant, watching a video and reviewing the technology in detail. She had studied our technical materials prior to arrival and asked several questions about our system's promised reduction in greenhouse gasses and diesel particulate emissions.

As leader of the Green Party of Canada and holder of the Order of Canada for her environmental advocacy, Elizabeth May is a recognized expert in the field of greenhouse gas reduction. During the visit Ms May made several immediate recommendations for contacts within the Canadian Federal Government, including references to the Ministers of Industry and Environment. We will be following up with these contacts in short order.

Empire Hydrogen CEO Sven Tjelta explains the patented technology of Empire's Fuel Enhancement System to Green Party Leader Elizabeth May.

Ms May's visit to Empire Hydrogen was covered by the local media in Sidney. An article has already appeared on the website of Peninsula News Review. For more information please contact Empire Hydrogen at 778.426.0911.
