

Empire Hydrogen - Butler Concrete & Investment Tax Credit

November 25, 2020: Saanichton, BC: Empire Hydrogen is pleased to announce the installation of a third evaluation unit at Butler Concrete in Saanichton, on Vancouver Island. Empire's Fuel Enhancement System was installed on the large, enclosed generator used for Butler's rock crushing operation. It will run for long hours every day to keep up with their ever increasing demand for concrete and aggregate products. Butler Concrete has made public their ambition to become the greenest concrete company in North America and Empire Hydrogen will move them well along towards this goal. They have more than 50 trucks in operation and are looking at Empire Hydrogen as an important component of their plans.

British Columbia CleanTech Investment Tax Credit

Now is the time to remind our investment partners that the 2020 tax year is soon ending. To take advantage of the 30% CleanTech Investment Tax Credit, BC based investors should contact us about purchasing additional shares at 75¢ each (only 52¢ once the tax credit is received). Of course we remind our investors that Empire Hydrogen shares are eligible for contribution to an RRSP, increasing the tax benefit significantly. We are anticipating several large orders in the coming months and are looking for the capital to build and deliver these units as quickly as possible.

Tax Savings Opportunity on a \$100,000 Investment
