

## Another Major Order for Empire Hydrogen

**May 3, 2021: Sidney, BC:** Empire Hydrogen is pleased to announce that we have received another significant order from the within Victoria region. Pacific Northwest Transportation Services has ordered ten units for their buses that showcase the beauty of the Provincial Capital to tourists from around the world.

Pacific Northwest Transportation Services is certified Green by the Vancouver Island Green Business Collective and has achieved 100% carbon neutrality through the purchase of carbon offsets from the Nature Conservancy of Canada Darkwoods Forest Carbon Project. PNW's long term pledge is to convert their entire fleet to zero-emission by 2030 and the Empire Fuel Enhancement System is an excellent way to move forward on that goal with existing diesel buses.

The purchase of these units is supported by the Government of British Columbia's CleanBC Heavy Duty Vehicle Efficiency Program that rebates 50% of the installed cost of an Empire Hydrogen Fuel Enhancement System. This is a direct result of the work Empire did with the BC Government two years ago to include our system in their CleanBC incentive program.

Production Manager Sam Freedman leads a team to deliver the first units ordered under the CleanBC Heavy Duty Vehicle Efficiency Program
