

Empire Hydrogen Installations for BC Ferries & City of Richmond

April 22, 2020: Surrey, BC: Empire Hydrogen has completed installation of our Class 8 and Class 6 units for BC Ferries and the City of Richmond.

The Class 6 model of Empire's Fuel Enhancement System produces up to 1.6 Litres of hydrogen/oxygen accelerant gases per minute, and is the perfect solution for delivery trucks up to 7L in displacement. We recently installed a Class 6 unit on a BC Ferries shuttle truck and a City of Richmond Tar truck.

City of Richmond Vacuum Truck

The City of Richmond made use of the Government's **CleanBC Heavy Duty Vehicle Efficiency Program** to cover 50% of the cost of the Empire Hydrogen Fuel Enhancement Systems including installation, saving the City nearly \$12,000.

City of Richmond Tar Truck

These installations are highly visible and will lead to inquiries from other truckers.

For more information, please contact Sven Tjelta or Andrew Evans directly at 778-426-0911 or Admin@EmpireHydrogen.com

Empire's Class 8 Fuel Enhancement System installed neatly on a City of Richmond dump truck

Empire's Class 8 unit is suitable for engines from 7L – 16L displacement. We recently completed installations on a larger BC Ferries shuttle truck and on a dump truck and vacuum truck for the City of Richmond. Both of these customers are evaluating the performance of their Fuel Enhancement Systems for potential larger rollouts in the future.
