

Empire Hydrogen Joins SmartWay

March 28, 2019: Empire Hydrogen is proud to be accepted into the SmartWay Transport Partnership, verifying our commitment to reduce greenhouse gas emissions and fuel consumption.

SmartWay is a joint public-private partnership between Natural Resources Canada (NRCan), the U.S. Environmental Protection Agency (EPA), private transport companies and industry affiliates, all of whom are working diligently to improve fuel efficiency and reduce greenhouse gases. During its first decade, the SmartWay Transport Partnership has saved 144 million barrels of oil and \$20 billion in fuel costs while reducing GHGs by 60 million tonnes. New partners from the transport industry are joining regularly, undoubtedly leading to exponential progress in all of these vital metrics.

The Canadian Federal Government and the BC Provincial Government are both enthusiastically promoting new GHG reduction technologies, such as Empire Hydrogen's Fuel Enhancement System. We will be making further exciting announcements as these incentive programs come on stream over the next few months.

Investment wanted: At Empire Hydrogen, we continue to look for investment partners who will enable us to initiate our rapid expansion plans. We encourage our existing shareholders to ask about our current activities and forecasts, and to help promote investment in Empire Hydrogen to your associates. Please do not hesitate to contact us directly for our most recent investment flyer.
