

January 24, 2022: Sidney, BC: Empire Hydrogen is pleased to announce our first installations on a major fishing fleet. Pacific Seafood has installed the Empire Hydrogen Fuel Enhancement System on two of its fleet; the MV My Lady Jane and the MV Viking Storm.

MV Viking Storm

MV My Lady Jane

Both of these fishing vessels, the 120' MV Viking Storm and the 70' MV My Lady Jane, operate with 30 Litre drive engines with dual air intakes and turbo chargers. As such, we have installed two Fuel Enhancement Systems, mounted back-to-back, on each vessel to provide sufficient hydrogen/oxygen accelerant gas for this size of engine.

These installations are subsidized by the Canadian Federal Government, Department of Fisheries and Oceans, "**Fisheries and Aquaculture Clean Technology Adoption Program**" (FACTAP) that provides a 75% rebate on green technologies. This program paves the way for a new market for Empire Hydrogen and we will be establishing a program specifically to target the fishing and aquaculture industries.

On Board the
MV Viking Storm
