

Empire Hydrogen Installation at Arch Angles Transport

November 25, 2022: Surrey, BC: Empire Hydrogen is very pleased to announce the installation of our first Class 8 Fuel Enhancement System with *Arch Angles Transport Ltd.* of Surrey, BC.

The green light tells drivers that the Empire Hydrogen Fuel Enhancement System is running perfectly

Empire's Class 8 Fuel Enhancement System installed neatly on an Arch Angles Transport truck

The Class 8 model of Empire's Fuel Enhancement System produces up to 3.5 Litres of hydrogen/oxygen accelerant gases per minute and is the perfect solution for large trucks up to 16L in engine displacement. This is our most popular model, having installations on trucks, buses, fishing boats, heavy equipment and generators. We recently installed Class 8 units on 50 trucks and rock crushing generators at Butler Concrete & Aggregate Ltd. in Victoria, BC.

Arch Angles Transport operates 15 general freight trucks from their location in Surrey, BC.

This installation is highly visible and we anticipate will lead to inquiries from other truckers.
