

## Empire Hydrogen installation on a Ready Jet

**August 22, 2022 - Saanichton, BC:** Empire Hydrogen customer Butler Concrete and Aggregate Ltd. has completed the installation of a Fuel Enhancement System on their Ready Jet Concrete Drum Cleaner that travels between Butler locations in southern Vancouver Island. The Ready Jet is a 20,000 psi extreme pressure wash machine used to remove fresh or dried material from inside large concrete drums. Without such a machine these drums would quickly become unusable. The water pump is run by a 350 hp Cummins diesel engine. This high consumption diesel engine is a perfect application for the Empire system.

Butler has purchased a total of 50 Fuel Enhancement Systems for installation on their concrete trucks and rock crushing generators. Butler has worked very hard to achieve its goal of being the “Cleanest and Greenest” concrete company in Canada. Empire Hydrogen is proud to be a partner in this effort.

Empire's Class 8 Fuel Enhancement System installed on a Ready Jet Concrete Drum Cleaner

Butler Concrete & Aggregate Ltd. ensures its reputation as the cleanest and greenest concrete company in Canada
