

CleanBC Incentive Program renewed and expanded to \$150,000

November 21, 2023: The Government of British Columbia has announced an expansion to the CleanBC Heavy Duty Vehicle Efficiency Program - providing up to \$150,000 per fleet in incentives. This includes \$4,000 per truck specifically earmarked for the Empire Hydrogen Fuel Enhancement System.

Our inclusion in this program is a direct result of efforts by Empire Hydrogen in 2018 when we contacted our local MLA - Adam Olsen, and suggested that the Fuel Enhancement System would significantly reduce GHGs directly in line with the CleanBC objectives. Mr. Olsen asked us to write the "Policy Brief" that was presented to the Provincial Minister of Transportation. Since this time nearly all of Empire's BC trucking customers have received a \$4,000 grant on each unit purchased.

We have long believed that while the cash incentive is important, it is the endorsement of our new technology by the BC Government that provides the greater benefit to Empire.

Also important is that the CleanBC Heavy Duty Vehicle Efficiency Program is being administered by the BC Trucking Association, which has gone out of its way to make the application process as seamless as possible for large fleets or individual owner/operators.

Please contact Andrew Evans or Sven Tjelta directly at 778.426.0911 to learn more about this program.
